

2001- Fish Passage Design at Road Culverts

A Technical Design Workshop
Presented by Washington Department of Fish and Wildlife
Environmental Engineering Division

If you design culverts or fish passage corrections at culverts, consider taking this workshop.

These one-day workshops are intended for engineers and designers that will participate in the design of culverts to improve fish passage. The workshop will include an overview of biological requirements at road culverts, Washington State fish passage design standards, culvert design process for fish passage, and project examples. New and retrofit culverts, fishways, and channel modifications will be discussed. Legal requirements and information needs for permit applications and review will be presented.

The workshops will be presented by: Ken Bates and Patrick Klavas; fish passage engineers with the Washington Department of Fish and Wildlife.

When and where:

Region 5	Vancouver	September 13, 2001
Region 1	Spokane	September 19, 2001
Regions 2-3	Moses Lake	September 20, 2001
Region 4	Mill Creek	September 27, 2001
Region 6	Montesano	October 04, 2001

*Additional workshops may be conducted in the spring of 2002.

There is no charge for the workshop. Each workshop will last from 8:30 am to 5:00 pm with an hour for lunch on your own. There is limited space available in each workshop.

Registration is on a *First Come – First Serve* basis.
